Case report

Please write a detailed report on the steps taken to analyse and contain this incident, including all relevant information and the rationale for its closure.

Time of Incident: 12/27/2025 15:32:48.164

User Involved: According to Company Information > Directory
Name: Ashwin Johnston
Email: ashwin.johnston@tryhutm.com
Role: Sales

Device: win-3455 (Windows host)

Incident Details: At 12/27/2025 15:32:48.164, a process creation event was logged where WUDFHost.exe (PID 3809) was launched with parent process services.exe (PID 3648). The process executed from C:\Windows\System32\WUDFHost.exe with a command line associated with User-Mode Driver Framework (UMDF) operations. The activity was flagged due to an uncommon parent-child process relationship.

Malware Identified: None identified.

Additional Investigation:
The instance happened twice within 5 minutes (12/27/25 3:38:05.248 PM - 3:34:01.248 PM)

Additional info:

- Parent Process: SERVICES.exe is the Windows Service Control Manager responsible for starting and managing system services and service-related processes.

Does this alert require escalation?

SIEM Investigation:

The instance happened twice within 5 minutes (12/27/25 3:38:05.248 PM - 3:34:01.248 PM)

The user's Role is Sales

Submitted report:

-Time of Incident: 12/27/2025 15:32:48.164

- User Involved: According to Company Information > Directory

Name: Ashwin Johnston

Email: ashwin.johnston@tryhatme.com

Role: Sales

-Device: win-3455 (Windows host)

-Incident Details: At 12/27/2025 15:32:48.164, a process creation event was logged where WUDFHost.exe (PID 3809) was launched with parent process services.exe (PID 3648). The process executed from C:\Windows\System32\WUDFHost.exe with a command line associated with User-Mode Driver Framework (UMDF) operations. The activity was flagged due to an uncommon parent-child process relationship.

-Malware Identified: None identified.

-Additional Investigation:

-The instance happened twice within 5 minutes (12/27/25 3:38:05.248 PM - 3:34:01.248 PM)

-Additional info:

Parent Process: services.exe is the Windows Service Control Manager responsible for starting and managing system services and service-related processes.

Child Process: WUDFHost.exe is the User-Mode Driver Framework host process used to run user-mode drivers for hardware devices such as sensors, USB devices, and portable devices.

Why This Is Uncommon: While WUDFHost.exe is a legitimate Windows component, it is typically spawned indirectly through device-related services or Plug and Play activity rather than being directly noticeable in process creation alerts. This relationship is less frequently flagged and should be validated to ensure it corresponds to legitimate hardware or driver activity.

-Recommendations: Escalate to Level 2 (L2) for further investigation and handling.
