Case report

Please write a detailed report on the steps taken to analyse and contain this incident, including all relevant information and the rationale for its closure.

Time of Incident: 12/27/2025 15:36:52.164

User Involved: According to Company Information > Directory
Name: Ashwin Johnston
Email: ashwin.johnston@tryhatme.com
Role: Sales

Device: win-3455 (Windows host)

Incident Details: At 12/27/2025 15:36:52.164, a process creation event was logged where WUDFHost.exe (PID 3710) was launched with parent process services.exe (PID 3817). The process executed from C:\Windows\System32\WUDFHost.exe with a command line consistent with User-Mode Driver Framework (UMDF) operations. The activity was flagged due to an uncommon parent-child relationship.

Malware Identified: None identified.

Additional Investigation: This alert is similar to ALERT 1008

SIEM Investigation:

The instance happened twice within 5 minutes (12/27/25 3:38:05.248 PM - 3:34:01.248 PM)

The user’s Role is Sales

Submitted report:

- Time of Incident: 12/27/2025 15:36:52.164
- User Involved: N/A
- Device: win-3455 (Windows host)
- Incident Details: At 12/27/2025 15:36:52.164, a process creation event was logged where WUDFHost.exe (PID 3710) was launched with parent process services.exe (PID 3817). The process executed from C:\Windows\System32\WUDFHost.exe with a command line consistent with User-Mode Driver Framework (UMDF) operations. The activity was flagged due to an uncommon parent-child process relationship.
- Malware Identified: None identified.
- Additional Investigation: This alert is similar to ALERT 1008
- Additional info:

Parent Process: services.exe is the Windows Service Control Manager responsible for starting and managing system services.

Child Process: WUDFHost.exe is the User-Mode Driver Framework host process used to run user-mode drivers for hardware components such as sensors, USB devices, and portable devices.

Why This Is Uncommon: Although legitimate, WUDFHost.exe executions are usually triggered by Plug and Play or device-related services and are not commonly highlighted in process creation alerts. This relationship is less frequently observed and should be validated to confirm legitimate driver or hardware activity.

-Recommendations: Escalate to Level 2 (L2) for further investigation and handling.
