☒ True positive

☐ False positive

Case report

Please write a detailed report on the steps taken to analyse and contain this incident, including all relevant information and the rationale for its closure.

- Time of Incident: 12/27/2025 15:48:25.164

- User Involved: According to Company Information > Directory
Name: Roger Fedora
Email: roger.fedora@tryhatme.com
Role: Marketing
Logged-in Host: win-3460

- Device: win-3460 (Windows host)

- Incident Details: At 12/27/2025 15:48:25.164, a process creation event was logged where taskhostw.exe (PID 3737) was launched with parent process svchost.exe (PID 3540). The process executed with command line "taskhostw.exe KEYROAMING" from "C:\Windows\system32". The activity was flagged due to an uncommon parent-child process relationship.

- Malware Identified: None identified.

- Additional Investigation:

Does this alert require escalation?

☒ Yes

☐ No

Logged-in Host: win-3460

- Device: win-3460 (Windows host)

- Incident Details: At 12/27/2025 15:48:25.164, a process creation event was logged where taskhostw.exe (PID 3737) was launched with parent process svchost.exe (PID 3540). The process executed with command line `taskhostw.exe KEYROAMING` from `C:\Windows\system32\`. The activity was flagged due to an uncommon parent-child process relationship.

- Malware Identified: None identified.

- Additional Investigation:

Additional info:

Parent Process: `svchost.exe` is a Windows service host process responsible for running background system services.

Child Process: `taskhostw.exe` runs Windows background tasks. The `KEYROAMING` parameter is related to roaming user settings and credential synchronization across devices.

Why This Is Uncommon: `taskhostw.exe` is usually triggered by the Task Scheduler or user session events. Direct execution by `svchost.exe` is less commonly observed and should be validated to confirm legitimate system activity.

- Recommendations: Escalate to Level 2 (L2) for further investigation and handling.

- This is a True Positive

- This needs escalation to L2 for further investigation
